including:
 · Analytical Methods for Machine Learning
 · Ethics in Responsible Artificial Intelligence
 · Data Engineering for Artificial Intelligence
 Graduates will be prepared for leadership and specialist roles such as AI Research Scientist, Machine Learning Engineer, Chief AI Officer, Data Science Director, AI Ethics Consultant, and AI Policy Advisor.
 “Our PhD in Artificial Intelligence is built around today’s workforce needs,” said Dr. McClain. “It prepares graduates to lead, innovate, and apply AI in meaningful ways across industries already being transformed by this technology.”
 Students will complete 60 credit hours at an affordable tuition rate of \$549 per credit hour (\$749 for the hybrid executive program) reinforcing the university’s commitment to access and value at the doctoral level.

LEADERS IN ACCESS TO RESPONSIBLE AI TOOLS

In addition to expanding

academic programs, University of the Cumberland has prioritized responsible access to AI tools that enhance teaching, learning, and research.

All undergraduate and graduate students receive full access to premium AI platforms, including:
 · Gemini
 · Google NotebookLM
 · Microsoft Copilot
 Additionally, all undergraduate students have full access to ChatGPT Edu.

These tools support research, synthesis, critical thinking, and idea development, while reinforcing ethical and academic standards for AI use.

“UC has been a leader in bringing AI into higher education in a thoughtful way, introducing AI programs early and giving

students access to AI tools while emphasizing responsible and ethical use in their academic work,” explained Dr. McClain. “One of the University’s core visions is to innovate to improve student learning outcomes and career preparedness, and I believe being a thought leader in AI is central to achieving that.”

With the launch of its Ph.D. in Artificial Intelligence and its Bachelor of Science in Artificial Intelligence, University of the Cumberland continues to expand its career-aligned program offerings designed to meet the evolving demands of today’s technology-driven workforce. By pairing rigorous academics with ethical, responsible access to AI tools, the university is preparing graduates to both lead and shape emerging fields.
