What is High Blood Pressure?

Blood pressure is the force of blood pushing against blood vessel walls. It's measured in millimeters of mercury (mm Hg).

High blood pressure means the pressure in your arteries is too high.

High blood pressure usually has no signs or symptoms. That's why it is so dangerous. But it can be managed.

Do you know your blood pressure numbers?

Monitoring your blood pressure can be easier than you think. You can take control and keep your blood pressure in a healthy range.

Self-monitoring is power.

High blood pressure can cause other health problems, like:

- Heart Failure
- Heart Attack
- Stroke
- Dementia
- Vision Loss
- Sexual Dysfunction
- Kidney Disease/Failure
